## Experience

- Jul 2022 – Present  
 Indie iOS Developer  
Self-employed
- Jul 2021 – Aug 2021 📍 Brașov  
 Android Developer  
IBM

Designed and developed iOS applications using Swift and SwiftUI. Implemented backends in Java using Spring Boot to handle data management and application logic.

Participated in an internship program focused on Android development with Kotlin. Completed an intensive course and built a functional Android application using Kotlin and Android Studio. Gained hands-on experience with MVVM, UI design, and API integration.

## Latest projects

### Buggloo - Insect Identifier

Built in SwiftUI, backend in Java with Spring. Buggloo transforms your iPhone into a pocket entomologist: snap a bug photo and instantly access species name, habitat, behavior, and more.
